

The International® CV™ Series includes commercial-grade features like a heavy-duty, gear-driven transfer case, a single straight, high-strength frame rail, an available air ride rear suspension, a forward-tilting hood with easy-to-reach maintenance points, 700 lb.-ft. of reliable torque and other features only found on a true commercial truck. And best of all, the CV Series is supported by the largest commercial dealer network in the industry with more dedicated truck bays and diesel technicians than anyone else. Smart, capable and strong, the CV Series is ready to take your business to the next level.

1 A FLEXIBLE FOUNDATION The CV Series is engineered to meet the needs of applications ranging from contractor dump and bucket lifts to roll-back recovery and emergency vehicles. Design elements like straight frame rails with no top-side rivets and available clean cab-to-axle configuration ensure streamlined upfitting and reduced modification costs regardless of the application.

2 AIR RIDE SUSPENSION Whether it's produce, appliances, beverage distribution or other sensitive cargo, the available segment-exclusive air ride suspension will help ensure your shipment arrives in-tact. Air ride suspension also provides the ability to adjust the ride height for optimum loading and unloading.

3 COMPETITIVE WARRANTY Relentless testing in brutal cold, punishing heat and extreme altitudes ensure the CV Series can perform in the harshest conditions. Backed by a competitive warranty and supported by industry-leading service from the largest commercial truck network in the country.

4 FORWARD-TILTING HOOD The CV™ Series' commercial grade forward-tilting 3-piece hood opens wide and provides easy access to the engine and routine service points. An integrated hood safety latch helps prevent the hood from inadvertently closing or being blown closed.

5 MORE CONFIGURATIONS With an available front drive axle, regular or crew cab configurations, a Gross Vehicle Weight Rating (GVWR) up to 23,500 lbs., and a Gross Vehicle Combination Weight (GCWR) Rating of up to 37,000 lbs., the CV Series is one of the most capable class 4/5 trucks on the road.

6 COMMERCIAL GRADE Whether it's the durability of a segment-exclusive gear-driven transfer case, an available 4-inch bumper extension for robust front-end grille and radiator protection, the self-cleaning slip-resistant steps or the sensible placement of the Diesel Exhaust Fluid (DEF) reservoir to avoid mixing fluids, the CV Series is designed and engineered for tough, commercial needs.

7 POWERTRAIN The International® 6.6 liter engine offers 700 lb.-ft. of torque and 350 HP to get the load moving and keep it moving over challenging terrain and steep grades. Allison automatics are available with several vocational codes and with or without PTO provisions to ensure versatility and long-term reliability.

8 OUTSTANDING MANEUVERABILITY The CV Series is designed to achieve up to a 50 degree wheel cut for outstanding maneuverability - critical in crowded jobsites or narrow streets. A rearview camera is also available to improve driver visibility when backing up/or reversing.

9 ACTIVE SAFETY TECHNOLOGY The CV Series is equipped with the Hydromax hydraulic four-wheel disc braking system and four-channel ABS for superior braking performance under all conditions.

10 DRIVERFIRST™ INTERIOR The CV™ Series' DriverFirst™ interior pairs hardworking functionality with automotive-like comfort. It is packed with features like available remote start with keyfob, leather wrapped steering wheel with fingertip controls, Apple CarPlay, Android Auto and plenty of storage to ensure comfort and productivity. Inside, triple-sealed doors reduce road noise and help mitigate driver fatigue.
